

# The Sprinter Mobility

For maximum mobility

Mercedes-Benz

# What can you expect from a Mercedes-Benz? More

There are minibuses. And then there are Mercedes-Benz minibuses. Faced with the cut-throat competition of today that star makes all the difference. It gives you a decisive advantage – as well as the satisfied feeling that you've done the right thing for the future of your business.

**At the forefront of progress.** Mercedes-Benz has taken responsibility for the bus like no other manufacturer in the world. And not just because Carl Benz built the world's first omnibus in 1895. But also because since then, Mercedes-Benz has refined the omnibus into the efficient, safe and environmentally-friendly means of transport it is today. That's why the Mercedes-Benz minibuses of today offer efficient, serviceable and cutting-edge solutions to the challenges of tomorrow. To make sure you stay one vital step ahead of your competitors in future. Responsibility obligates.

# Sprinter Mobility: highlights

As flexible as life itself, the Sprinter Mobility will quickly become an indispensable part of your fleet. A school bus by morning, in the afternoon a people's bus, in the evening a taxi-sharing service; at the drop of a hat the Sprinter Mobility can adapt to a wide variety of requirements.

**Quick-change artist.** You've just used your Sprinter Mobility to drive a group of wheelchair users to a sports event. And now you'll need its full seating capacity to send it out as a taxi-sharing service. No problem. The ability to adapt the passenger compartment quickly to different needs is one of the Sprinter Mobility's strengths. At the heart of this capability is an aluminium flooring system with integrated anchoring rails that facilitate many different seating layouts and wheelchair retaining systems, allowing up to eight passenger seats, six wheelchairs or mixed use.

**Ample performance, meagre fuel consumption.** The Sprinter Mobility is even more economical than its predecessor. The new four-cylinder CDI engines with diesel particulate filter and a Euro V emissions rating are significantly more powerful, despite delivering comparable fuel economy. Meanwhile, the much longer, use-dependent oil change and servicing intervals reduce the number of workshop visits, thus lowering your life cycle costs.

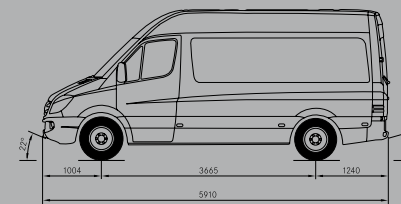

**Playing it safe.** The Sprinter Mobility is one of the safest minibuses in its class. That makes it first choice for tasks such as conveying people of restricted mobility. ABS, ASR, Brake Assist (BAS) and electronic brake force distribution, combined with the standard ADAPTIVE ESP® ensure that the Sprinter Mobility masters critical situations with ease.

**Enjoying the benefits of a passenger car.** A car driving licence is all you need to drive a Sprinter Mobility, making it the ideal solution for taxi firms or for use as a people's bus or team bus. Its compact dimensions and the car-like driver comfort offered by its superb cockpit ergonomics are features that every driver will quickly come to appreciate, and your passengers will be equally impressed by the Sprinter Mobility, not least because of its excellent ride comfort.

# Big on class, small on cost

When it comes to cost effectiveness the Sprinter Mobility is a star. Not only because you can use it so flexibly and open up new routes, but also because it's so sparing on your financial resources.

**The alternative that pays off.** The Sprinter Mobility pays for itself. Thanks to its flexible equipment it is ideal for high workloads, making it a double income earner par excellence. A few swift adjustments convert it from a vehicle for conveying passengers of restricted mobility into a taxi, people's bus or shuttle.

And the Sprinter Mobility's flexibility makes itself felt even before you take your first journey in it. You have the choice of two different vehicle lengths for up to eight passengers or six wheelchairs. And you can choose precisely the vehicle equipment you need for your drivers and target groups, thus ensuring you have the right vehicle for your anticipated uses.

**Tried-and-tested a million times over.** With the Sprinter Mobility you benefit from a sophisticated and successful vehicle design. Over 1.3 million Sprinters have been sold over the past ten years. And because the Sprinter's main components are mass produced, you get great value for money.

**In-built Efficiency.** The Sprinter Mobility offers exemplary cost effectiveness and low life cycle costs thanks to a whole array of well thought out details such as the standard service computer that permits flexible use-dependent oil change intervals of at least 40,000 km in the diesel models.

The Sprinter Mobility comes with a choice of two torquey four-cylinder CDI diesel engines generating 80 kW or 110 kW. Both feature a whole series of technical innovations which

ensure durability, performance and driving comfort. All EU engines meet the Euro V standard, and the CDI engines are fitted with catalytic converters and diesel particulate filters for active exhaust treatment, while the exhaust system's permanent regeneration process prevents the particulate filter from clogging up.

**Light on its feet:** The 6-speed transmission offers impressively precise gear changes. The joystick gearshift is ergonomically placed on the mid console and is a pleasure to use thanks to its short travel and low operating force. Those looking for still more comfort can opt for the five-speed automatic. Quality thought out down to the last detail – that's Mercedes-Benz.

# Make yourselves at home

Anyone taking a seat in the Sprinter Mobility will feel at home straight away, whether they're in a wheelchair or a passenger seat. Thanks to the wide array of equipment options you can design the interior to meet your personal needs.

**Room to relax.** The Sprinter Mobility promises comfort from the moment you step inside. Its wide door and low entry height make it easy for your passengers to board, and an electrically-operated step for the sliding door or co-driver door is available as an option. To help wheelchair users get on and off, the Sprinter Mobility offers convenient lift systems fitted to the wide rear doors.

Despite its compact dimensions the Sprinter Mobility offers plenty of space and 190 cm headroom in the passenger compartment. The interior is light and friendly in design with a colour scheme featuring discrete shades of grey. The durable floor, wall and ceiling panelling are pleasant to the touch, further highlighting the quality of the Sprinter Mobility. Ergonomically-shaped passenger seats fitted with three-point seat belts provide safe and comfortable restraint even on the longest journey.

**A pleasant climate all year round.** Relax, sit back in comfort and take a deep breath – no problem in the Sprinter Mobility at any time of year thanks to the reliable ventilation and heating systems. And the Mobility also offers electronically-controlled passenger and driver air conditioning as optional equipment to ensure a pleasant temperature even on the hottest days. Modern infotainment also contributes to the good atmosphere on board, with electronic entertainment packages available to suit your precise needs.

# A very special workplace

Other bus drivers will envy your drivers at their workplace. Behind the wheel the Sprinter Mobility offers many conveniences and innovative technology features to make working in it a positive pleasure.

**Feels like being in a car.** A cockpit the way bus drivers like it. In many respects the driver area in the Sprinter Mobility resembles that of a car. And naturally that goes for the comfort levels too. Quite simply, driving a Sprinter means driving a Mercedes-Benz.

The area is spacious enough for amply-proportioned drivers to feel comfortable, and the optimised ergonomics ensure that your drivers have a good view of all the controls and instruments. Features to help the driver concentrate fully on the job in hand include electric windows and the central locking remote control, while handy extras such as the multi-function steering wheel with its trip computer and the cruise control with its variable speed limits are also available.

Other options available to make your drivers' work easier include the bus PA system with gooseneck microphone, the navigation system and the universal mobile phone pre-installation.

**Driving comfort to the fore.** Its out of the ordinary, car-like driving dynamics and drive comfort will find favour not only with your drivers but also your passengers, who will love the ride in the Sprinter Mobility. The predecessor model already stood out in its class for its first-class road holding and now, thanks to a range of improvements, it's even more comfortable. A paragon of sophisticated driving technology: the Sprinter Mobility.

# Safety from A to Z

The bus is one of the safest ways of travelling in the world, and innovations by Mercedes-Benz have played a major part in bringing that about. Find out for yourself about the benefits of the Mercedes-Benz integrated safety system. The Sprinter Mobility makes it possible.

**Safety that thinks of everything.** Ever since Carl Benz invented the omnibus Mercedes-Benz has pioneered further developments in bus safety. Many of the innovations that are standard features today first saw the light of day in a vehicle bearing the Mercedes-Benz star. All the while Mercedes-Benz has pursued the vision of accident-free travel, and the Mercedes-Benz integrated safety system represents a major step towards realising that dream. The system rigorously implements concepts designed to cover all aspects of automotive safety, from safety while under way to safety in hazardous situations, protection in the event of accidents and minimising the consequences of any accident.

**Electronic Guardian Angels.** Its comprehensive safety technology makes the Sprinter Mobility one of the safest minibuses on the market, and the buses' innovative electronic guardian angels play a major part here. As well as ABS and ASR, the Sprinter Mobility is also fitted with such features as ADAPTIVE ESP®, which boosts the vehicle's stability when cornering at speed or having to take sudden evasive action. Unlike conventional electronic stability systems ADAPTIVE ESP® takes the buses' current load into account when making adjustments.

The BAS braking assistant offers extra safety when braking hard. If the driver hits the brake pedal at more than a certain speed the system interprets this as emergency braking and automatically applies maximum braking force within a fraction of a second, even if the driver has not yet fully depressed the brake pedal. This reduces the braking and stopping distances should the driver fail to apply sufficient emergency braking pressure. The adaptive brake lights increase active safety in the event of emergency braking by providing a more conspicuous warning. The brake lights begin to flash during emergency braking from 50 km/h or higher. If the vehicle comes to a stop after emergency braking from 70 km/h or higher, the hazard warning lights are also activated automatically. These measures warn the vehicles behind and reduce their drivers' reaction times. Start-Off Assist (AAS) facilitates pulling away safely and comfortably on gradients steeper than 4%. AAS maintains braking pressure for about two seconds after releasing the brake pedal to allow your drivers to switch easily from the brake to accelerator pedal as they drive off.

**Safe from the ground up.** Many details make the Sprinter Mobility one of the safest representatives of its class. For example, the Sprinter passenger compartment provides passengers and driver alike with better protection than ever before. The passenger seats offer a high degree of lateral support and are fitted with three-point seat belts. The driver and co-driver seats are protected by front air bags, while thorax and window airbags are available as special equipment. The optimised braking system is fitted with EBV electronic brake-force distribution, which ensures a high level of driving safety by dividing the braking force between the front and rear axles according to the current driving situation in order to generate the maximum braking effect. A further visible safety gain is provided by the optional bi-xenon headlamps, which provide excellent illumination of the road ahead and to one side even round sharp bends thanks to their integral static turning and cornering lights.

SPRINTER  
MOBILITY

# Unmistakably a Mercedes-Benz

Are you ready for a minibus that's a class apart? The technology that flows into the Sprinter Mobility reflects over 100 years of bus building experience. And its strikingly elegant appearance ensures that it delivers a genuine competitive advantage for you.

**Outstanding design.** No wonder it turns heads. The eye is drawn by the muscular front with the striking contours of the headlamps and radiator grille and the distinctive Mercedes star sitting proudly in the centre. Even from a distance the Sprinter Mobility is unmistakably a Mercedes-Benz. This means it is more than just a business card attesting to the quality of your fleet, you also benefit from the special international esteem that the Mercedes star enjoys and can use the power of the Mercedes-Benz brand for your business.

**Everything from a single source.** Unlike other minibuses, where the base vehicle and superstructure are produced by different manufacturers, the Sprinter is 100% Mercedes-Benz. That's something you'll notice throughout the Sprinter Mobility's service life, because all the components are designed for each other. As your vehicle comes from a single source Mercedes-Benz is your sole contact partner whatever your query, not only for advice and customer care but also via *OMNIplus*, our service partner for Mercedes-Benz omnibuses.

**All-Star service.** The services available for the Sprinter Mobility are in a class of their own too, in keeping of the high expectations you have of Mercedes-Benz. For instance, you benefit from the largest and densest service network in Europe, guaranteeing short trips and thus reducing downtimes. However, you won't have to make use of the service too often because after all, the Sprinter Mobility is a Mercedes-Benz.

# OMNI*plus* – a partner that keeps your business on the move

## Service that's always there for you

Keep moving. OMNI*plus*, the service partner for your Mercedes-Benz bus or coach will help you do just that thanks to the closest-knit bus and coach-specific service network in the whole of Europe, the ServiceCard, 24h SERVICE as well as OMNI*plus*-approved genuine parts and accessories, all with the quality you'd expect from OMNI*plus*. We also offer the OMNI*plus* TireService and, covering all of Germany, the OMNI*plus* BusPool. For the best possible level of assistance in the event of a breakdown.

## Choose from a range of options that delivers what it promises

Benefit from extensive workshop expertise. The OMNI*plus* ServiceSelect service contract model provides you with a customised service package for repair and maintenance, allowing you to increase the operational readiness of your fleet – with reliable fixed costs and no nasty surprises. All of which means you can plan your vehicle operating costs more accurately and also benefit from minimal downtime and administrative overheads.

## Training camp for professionals

Whether it's safety training, eco-training, technology training or communication training – OMNI*plus* enables you to specifically hone your technical skills and build on your know-how. And, of course, OMNI*plus* driver training courses qualify as continuing education under the Professional Drivers' Qualification Law.

#### **Europe-wide selection of used vehicles**

OMNI*plus* offers you a large selection of used vehicles throughout Europe. Our network of 25 used vehicle centres and the numerous online offers on our website make it easy for you to find the right bus or coach. Detailed information and suitable vehicles can be found on the Internet at [www.usedvehicles.omniplus.com](http://www.usedvehicles.omniplus.com)

#### **Financial services tailored specifically for buses and coaches**

Our bus and coach-specific financing, leasing and insurance services provide you with an extremely fair solution to your operating requirements. The experts from Mercedes-Benz Bank will provide you with specific advice and put together a compelling package for you tailored to your personal requirements.

#### **Latest news and in-depth information**

We do our utmost to constantly improve and extend the OMNI*plus* service line-up, not least because we are determined to make sure you'll also go away entirely satisfied in future. Take a look on the Internet for the very latest news and detailed information on all our services, simply by going to [www.omniplus.com](http://www.omniplus.com)

Further information is available from your bus and coach dealer. Or visit us at: [www.mercedes-benz.com](http://www.mercedes-benz.com)
