FLEETBOARD®

**Sales Team
International**

Editorial

In the last few years FleetBoard has continued to grow successfully.

The key to this impressive growth is our proven products, which are continually developed in line with the market requirements. FleetBoard provides a complete range of modules for **Logistic Management, Vehicle Management, Time Management** and **Temperature Management**. These FleetBoard telematics services applications for commercial vehicle customers and logistics experts are in use in our domestic market, Germany, in Europe and in selected non-European markets.

We will continue this sustainable growth in all markets in the future therefore we have expanded our Sales Team. Our specialised and competent Sales Managers are now on location for our international clients, too. Their long-term experience makes them a reliable consultant for telematics-based fleet management.

I am pleased to introduce our expanded and experienced Sales Team to you in our new sales brochure.
